## Types of Teas we Offer

Green Tea

Herbal Teas

Black Tea

## Packaging We Offer

### Teabags with Custom Tags

Side/Bottom Filling Teabag

Bio/Nylon Pyramid Teabag

**BIODEGRADABLE**  
pyramid tea bag!

Take your plant based tea bag out of your cuppa

To biodegrade into compost... back to nature!

Pop it in your food waste bin

# Tea Leaves From Harvest to Cup

## HARVESTING

Harvesting can be done by **HANDS** or by **MACHINERY**, although hand-picked tea has smoother flavor and higher quality than the tea trimmed by machine. The top two or three leaves are the youngest and will give the best quality green tea.

## PROCESSING

1.

### WITHERING

When the leaves are plucked they begin to wilt. Controlling the **HUMIDITY**, **AIR FLOW**, and **TEMPERATURE** during this process will prepare the leaves for further processing. The aim of this stage is reducing the moisture from leaves and allowing tea to develop its distinctive aroma and flavor.

2.

### STEAMING OR PAN-FRYING

Steaming or frying the tea leaves in the pan will save the green color of the leaves and **STOP THEIR OXIDATION**. This will prevent green tea leaves from becoming black or oolong tea.

3.

### ROLLING

In this stage leaves are cooled, then rolled in order to break the leaf cells and release essential oils and enzymes which give tea its **UNIQUE FLAVOR**. Rolling can be done by hand or by machine.

4.

### DRYING

There are several types of drying but all of them have the same goals: to **PRESERVE TEA** for later usage, reduce any left moisture, and maintain the color and taste of the green tea.

5.

### SORTING

Sorting according to grade - after drying, tea is being sorted according to **SIZE AND GRADE** and prepared for packaging. The highest quality tea is made from unbroken whole tea leaves.

## Custom Sachets/Envelopes

## Custom Display Boxes

## Our Social Initiatives

- Being Eco-Responsible
- Women Empowerment
- Education to all
- Sustainable Livelihood for our Farmers

1% Donated to a solidarity association

We also contribute 0.1% of our revenue to carbon removal
